

RADCamTM Enterprise

Security With a Voice

RADCam talks in real time.
It deters intruders and escalates
threats to keep sites secure.

Active Response

RADCam Enterprise is more than a camera. It's a security responder that detects people, verifies activity, and deters threats with SARA Edge, RAD's voice-driven AI. Out of the box, it delivers the core analytics every site needs.

Traditional surveillance only records. RADCam Enterprise acts in real time, escalating verified threats through SARA Lite Agentic AI. This keeps security teams focused on real incidents instead of nuisance alerts.

Human Detection

Instantly recognizes people on site with advanced AI algorithms that distinguish between humans, animals, and environmental factors.

Perimeter Intrusion

Detects people entering restricted areas after hours with customizable zone monitoring and instant notifications.

Security With a Voice. Discover RADCam Enterprise.

With SARA Edge, RADCam speaks directly to intruders, delivering real-time voice deterrence that helps prevent incidents from escalating. Working with SARA Lite Agentic AI, it verifies events and ensures only true threats are escalated. Notifications reach responders by SMS, email, or live call so teams stay focused on what matters and avoid false alarms.

Detection

Immediate threat detection, through AI-driven analytics.

Verification

SARA Agentic AI verifies alerts in real time.

Deterrence

Autonomous audio and visual pushback to deter intruders.

Escalation

SARA Agentic AI escalates incidents to responders.

Response

Responders receive scene updates and direction.

Resolution

Incident reports are generated instantly.

WORKS ACROSS ALL MAJOR VMS PLATFORMS, INCLUDING GENETEC™ AND MILESTONE™.

Always On Duty

Key Capabilities

Immediate Deterrence

SARA Edge voice engagement issues real-time warnings to deter intruders.

SARA Lite Escalation

Intelligent notifications via SMS, email, or live call ensure rapid response.

Flexible Deployment

Deploy stand-alone via Wi-Fi or integrate with ROSA, ROSA Lite, or RIO.

Centralized Support

Comprehensive support infrastructure for single or multi-site installations with centralized management.

Simple Management

Full mobile access and reporting through RAD Mobile and RADSOC for security oversight anywhere.

Technical Specifications

Video Resolution	1080p
Viewing Angle	90°
Infrared Range	30 Feet
Operating Temp	23°F - 131°F
Ingress Protection	IP66
Connectivity	2.4 GHz Wi-Fi or direct ROSA/ROSA Lite/RIO
Audio	SARA Edge + Intercom
Warranty	Limited lifetime (with active subscription)
Analytics	Human detection, perimeter intrusion
Management	RADSOC + RAD Mobile
Power	Standard AC
Integration	Major VMS Compatible

Smart Security Starts Here

RADCam Enterprise brings intelligent security within reach for every organization. It goes beyond recording to deliver real-time engagement, helping reduce risks and keep sites secure. Whether protecting retail stores, office buildings, warehouses, or storage facilities, RADCam provides the essential analytics and voice deterrence needed to address threats as they happen.

Backed by RAD's ecosystem of connected devices and platforms, RADCam Enterprise is simple to deploy, easy to manage, and built for long-term reliability. With proactive monitoring and seamless integration, it delivers enterprise-grade security at a cost that makes sense for small and mid-sized sites.
